Experience

April 2024 - PRESENT

H2M A+E, NYC – *Senior Structural Engineer*

- Lead multiple major projects, including school additions and wastewater facilities, overseeing staff and coordinating with multidisciplinary teams.
- Perform structural analysis and design for diverse building systems, specializing in steel and concrete for mid to high-rise structures.
- Manage restorations and new constructions, ensuring seamless integration of structural elements with architectural and MEP designs.
- Conduct site inspections, review shop drawings, and handle RFIs across various project phases.
- Spearheaded the development of the team's Revit infrastructure, standardizing libraries, optimizing templates, and creating custom plugins to enhance productivity.
- Mentor junior engineers while collaborating with PMs to monitor budgets and track change orders.

November 2018 - April 2024

Mar Structural Design, Berkeley CA – *Project Engineer*

- Produced calculations and construction documents for a range of projects, including a city-owned summer camp, a 142,500 square-foot K-8 school, prefabricated modular schools, affordable housing complexes, and renovations of Berkeley High School and a 1920's theater, utilizing steel, concrete, timber, and masonry.
- Successfully managed multi-million dollar projects on-time and on-budget, creating proposals, budgets, and work plans, directing engineers, and leading design meetings.
- Administered construction phases, including shop drawing review and international correspondence with steel fabricators in China and Mexico.
- Conducted complex non-linear FEA seismic risk assessments to enhance project resilience.
- Developed and implemented new office calculation and Revit tools, streamlining productivity and leading onboarding and training to foster a collaborative work culture.

Summer 2015 & 01/2016 - 10/2018

Ware Associates A+E, Oakland CA – *Structural Designer*

- Produced calculations and construction documents for high-end residential and community structures across steel, concrete, wood, and masonry.
- Led concept design for a custom truss, pedestrian bridge, and residential rooftop addition, including an FEA feasibility study.
- Administered construction phases, including shop drawing review and site visits.
- Trained interns and developed in-house design tools to improve efficiency and quality.

Certifications

P.E. Civil, Massachusetts: License No. 58732

P.E. Civil, New York: License No. 110141-01

Skills

Etabs, Perform3D, Karamba3D, Risa, Revit, Dynamo, Autocad, Rhino, Grasshopper, Adobe, Twinmotion, Bluebeam, Microsoft Suite, Matlab, C# & Visual Studio

Education

August 2011 - December 2016

California Polytechnic State University, San Luis Obispo – *Bachelor of Science and Master of Architectural Engineering*

Publications

Lateral Strength and Ductile Behavior of a Mortise-Tenon Connected Timber Frame

- World Conference on Timber Engineering 2018, Seoul S.K.
